

Protecting Your Business: Why Microsoft 365 Business Premium Is a Smart Upgrade

If your business relies on Microsoft 365, the license you choose makes a big difference to your **security, control, and compliance**.

We're increasingly recommending **Microsoft 365 Business Premium** for our clients not because it's the most expensive option, but because it includes **powerful tools** that protect your data, your users, and your devices.

Here's a quick breakdown of why it's worth the upgrade:

Microsoft Defender for Office 365

Advanced protection against modern threats like phishing, ransomware, and impersonation.

- Quarantines suspicious emails before they hit inboxes
- Blocks links and attachments that lead to malicious content
- Stops domain and user impersonation attacks
- Sends quarantine reports so users stay in control

Data Loss Prevention (DLP)

Stops sensitive information from leaking whether accidentally or intentionally.

- Detects and blocks the sharing of credit card numbers, national insurance numbers, and other sensitive data
 - Helps enforce compliance policies without user intervention
 - Prevents data from being copied, emailed, or uploaded where it shouldn't be
-

Microsoft Intune

Complete control over company devices - laptops, phones, tablets and PCs.

- Securely manage who can access your data, and from where
 - Enforce encryption, antivirus, and update compliance
 - Lost or stolen device? You can **remotely wipe company data**
 - Only allow **trusted and compliant devices** to access sensitive files
-

Entra ID P1

Smarter identity and access management with Conditional Access.

- Enforce **Multi-Factor Authentication (MFA)** in a flexible, targeted way
 - Block logins from high-risk locations or **allow trusted exceptions for holidays and travel**
 - Require that only compliant devices can access company data
 - Reduce risk without increasing user friction
-

What This Means for You

You get a **full-featured Microsoft 365 license** with tools designed for today's remote, hybrid, and mobile workforce **without needing to layer on third-party tools**.

And as always, **Cortec can help** with licensing, configuration, and security setup so you're getting the most from what you're paying for.

Not Sure Which License You're Using?

Many businesses are still on Microsoft 365 Business Standard a great productivity tool but missing these key security features. **We can check your current setup, compare**

license options, and help you transition securely.

Get in touch with the Cortec team and we'll advise on the best fit for your business.
